THERMAL CAMERAS FOR PANDEMIC RESPONSE

ACCORDING TO THE CDC'S NEW GUIDELINE, PRE-SCREEN: EMPLOYERS SHOULD MEASURE THE EMPLOYEE'S TEMPERATURE AND ASSESS SYMPTOMS PRIOR TO THEM STARTING WORK. IDEALLY, TEMPERATURE CHECKS SHOULD HAPPEN BEFORE THE INDIVIDUAL ENTERS THE FACILITY.

YOU CAN PROTECT YOUR EMPLOYEES AND YOUR BUSINESS BY UPGRADING YOUR SURVEILLANCE SYSTEM WITH A BODY TEMPERATURE THERMAL CAMERA. WITH A THERMAL CAMERA YOU CAN QUICKLY AND EFFICIENTLY SCREEN ALL OF YOUR EMPLOYEES AS THEY ENTER OR APPROACH YOUR FACILITY. IF A TEMPERATURE ANOMALY IS DETECTED, AN ALARM WILL NOTIFY THE APPROPRIATE PERSONNEL SO THE INDIVIDUAL CAN BE REDIRECTED TO AN APPROPRIATE SECONDARY SCREENING ZONE FOR FURTHER EVALUATION.

BOSS SECURITY & AUTOMATION IS DEDICATED TO HELPING YOUR BUSINESS PREVENT AND SLOW THE TRANSMISSION OF THE CORONAVIRUS.
